

1. Study Scope –

- 1-2 years study duration
- Suggested max total budget = \$35,000; Absolute max budget = \$50,000.
 - MVD testing included in study design does not count against total budget.
- Studies should be designed to expand knowledge in the areas of diagnosis, treatment, treatment monitoring, or prevention of invasive fungal infections (or oomycosis) in veterinary species.
- No induced disease (or USDA Pain Category E) studies will be funded.
- Direct clinical applicability is desired, but not required.
- Young investigator (≤ 6 years appointment), house-officer, or veterinary student projects are encouraged, but not required.
- Cross-functional collaborations are encouraged, but not required.

2. Additional Requirements –

- If client-owned animals are used, an IACUC approved consent form needs to be submitted before funding.
- Study Agreement and Funds Transfer forms must be signed and returned to MVD before funding. These will be provided if proposal is selected for funding.
- A Study Completion Report form is due within 2 months of study completion.
- Funding by MiraVista Diagnostics should be acknowledged in all presentations, written publications, and other media outlets.

3. Submission Details –

- Submission deadline by 1 Sep 2024
- Investigators will be notified by 1 Oct 2024
- Submit Proposal form and supporting documents as appropriate to:
ahanzlicek@miravistalabs.com
- All forms should be submitted as PDFs.
- For questions please call (317-455-2166) or email (ahanzlicek@miravistalabs.com).
